

# Better Schedules, Happier Providers

## What We Know

- Unbalanced schedules lead to feelings of frustration.
- Clinicians are struggling physically, mentally, and emotionally.
- The status quo is harmful to clinicians and dangerous for patients.

## What Care Teams Say<sup>1</sup>

**39%** 39% of clinicians feel a "more manageable work schedule" would decrease burnout.

**70%** 70% of physicians would not recommend the profession to loved ones.

## Average Care Team Working Hours

25% of US physicians work > 60 hours per week.

**25%**

Avg resident = **80 hours**

Avg attending = **51 hours**

## 6 Ways to Support Workforce Wellness

**1**

### Streamline Schedule Changes

Make shift swaps and time-off requests simple.

**2**

### Optimize Schedules

Accommodating providers' individualized criteria, like productivity, specialization, and personal preferences produces efficient, balanced, and optimal schedules.

**3**

### Full Transparency

Provide system-wide visibility into the latest, most up-to-date schedule.

**4**

### Avoid Payroll Mistakes

Integrate schedules with the payroll system to ensure accurate pay for providers and adherence to contractual requirements.

**5**

### Support OR Teaming

Automatically pair anesthesiologists and surgeons to the correct cases with their defined team preferences.

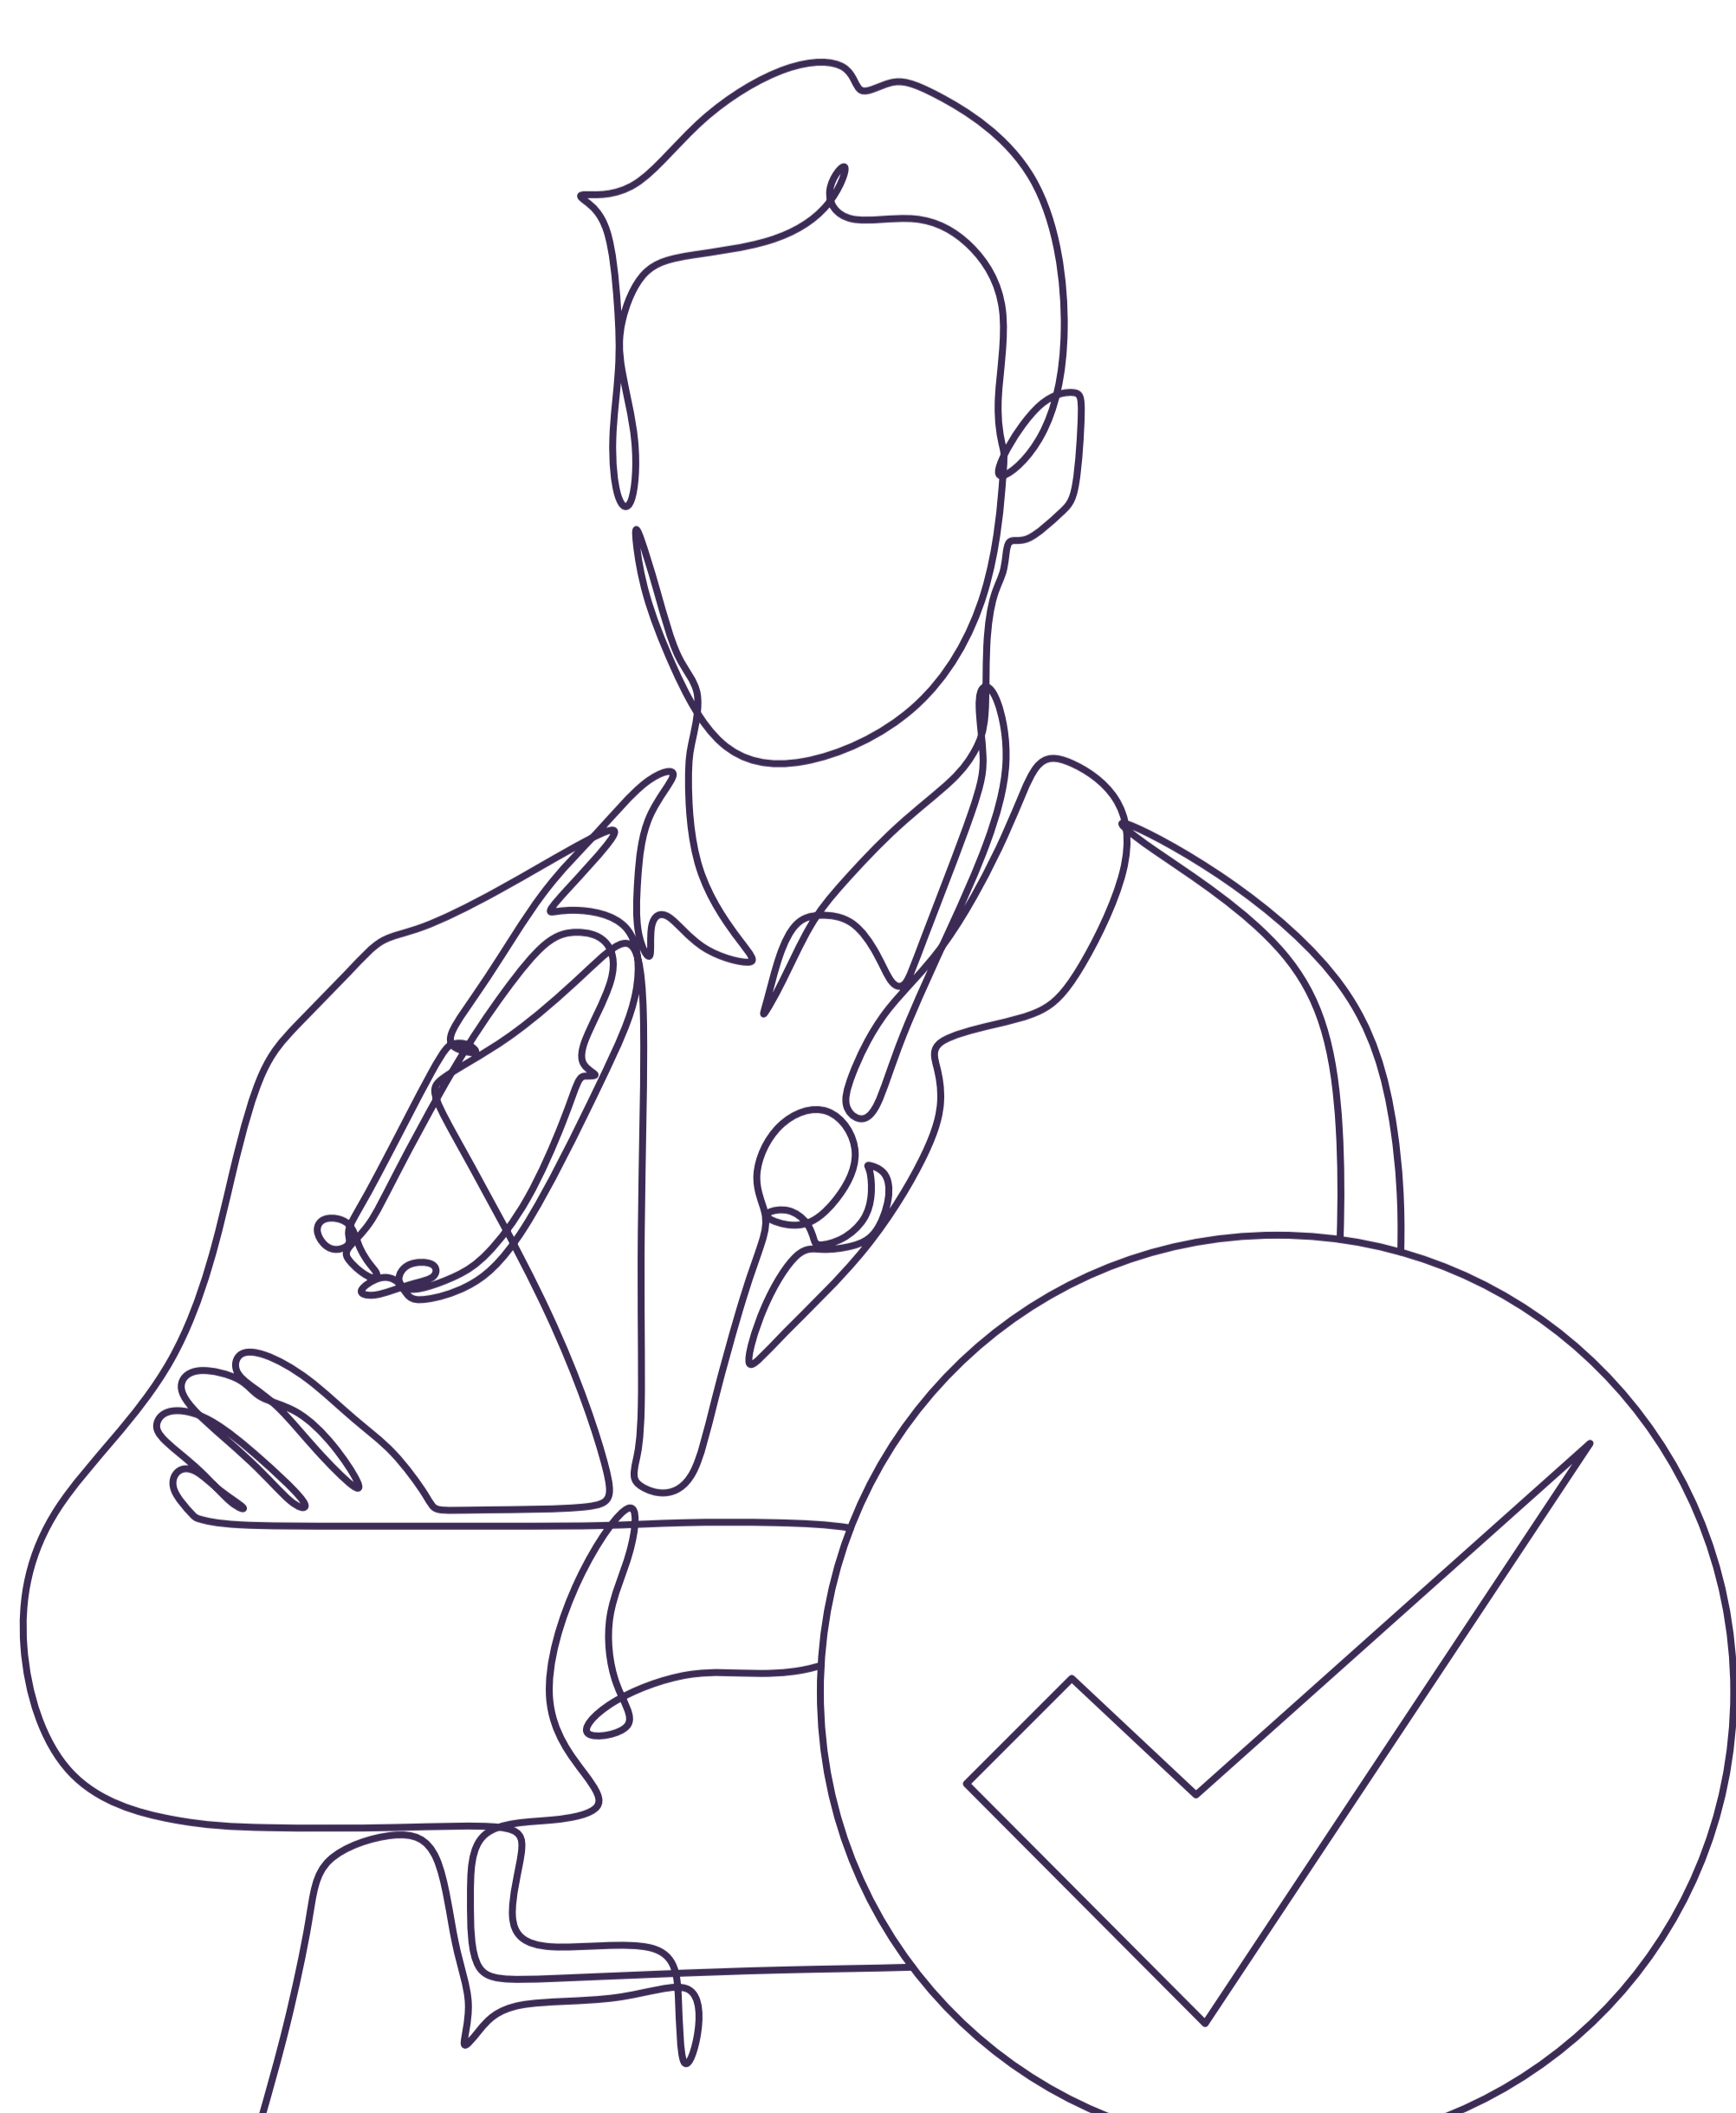

**6**

### Team Check-Ins

Share an in-app wellness survey to gauge the current state of your team and, where necessary, take preventative measures against burnout.

## Positive Outcomes from Organizational Peers

### Ochsner Health System

**55%** Approvals for time-off requests increased by 55%<sup>2</sup>

**30%** Physician engagement increased by nearly 30%<sup>2</sup>

### University of Kentucky HealthCare

**88%** Connection time with on-call providers reduced by 88%

### Tower Health

**1000+** Automated the management of 1000+ requests and preferences per month
